

imp The Protector™

The Ultimate in chafe/pressure relief featuring Phase 4™ Gel

A unique approach to patient comfort & skin protection!

Fully tested & approved for skin contact.

The Protector™ provides comfort while exuding an FDA grade white mineral oil. The oil is excellent at softening the skin.

The Protector™ has been found to prevent chafe damage during and after physical therapy and may be trimmed as desired and retained as

necessary to provide the best in patient comfort & protection.

The Protector™ comes in four standard sizes.

Applied directly over a closed surgical site or healing wound The Protector™ protects the skin from chafing and pressure injury where belts, straps and other clothing items irritate.

The Protector™ is an easy-to-apply gel guard that adheres to the skin and serves as a defense from sources of irritation. The Protector's™ natural tackiness helps keep it in position or can be taped.

Users should replace the pads daily for maximum benefit.

The Protector's™ uses are only limited by the imagination of the medical professionals taking advantage of its unique characteristics!
